Personal Summary

Civil Engineer (Office Engineer) with 6+ years of professional experience in planning , managing and executing a variety of construction and infrastructure projects. Proven expertise in autocadfloor planning, project management and other building documented work. Combined with a strong foundation in civil engineering principles. Skilled in utilizing advanced engineering software, conducting feasibility studies, and ensuring compliance with safety regulations and standards. Demonstrated ability to lead cross-functional teams, optimize project efficiency, and deliver high-quality outcomes within budget and timeline constraints. Adept at problem solving and adapting to dynamic project requirements, with a commitment to sustainable and innovative engineering solutions.

Accomplishments

- Built soild relationship with clients resulting in increase in revenue.
- Acted as Planning and Design Engineer on multiple sigining and marking projects.
- Trained and mentored a lot of Autocaddesigners over a period of 6 years.
- Completed number of residential and commercial projects as a Autocad designer.
- Supervised number of residential and commercial projects.
- An experience of more than 7 years in Autocad residential and commercial building designing and 6 months in industrial building designing.

Experience

- June 2019 - September 2025
  Planning Engineer, Site Supervisor & AutoCAD 2D Designer
  R K Group of Engineers, Jamkhandi, Karnataka, India

- October 2025 - March 2026
  Civil CAD designer at Rexline Engineering (EPCM company)
Surabaya, Indonesia

Responsibilities

- Successful Project Delivery : Managed and delivered numerous building construction projects, consistently meeting or exceeding client expectations.
- High-Quality Designs: Produced precise and innovative AutoCAD designs for various types of construction projects.
- Efficient Site Supervision : Ensured smooth site operations, maintaining high standards of safety and quality control.
- Accurate Estimations: Developed detailed and reliable cost estimates, contributingto successful project bids and budget management.
- Technical Knowledge: A planning Engineer is a strong understanding of engineering principles and construction methodologies is essential. It helps you grasp the technical aspects of the projects you'll be managing.
- Data Analysis: The ability to collect, analyze, and interpret project data empowers you to make informed decisions and adjustments to project plans.
- Accuracy: Being meticulous and detail-oriented is vital in creating precise project schedules and reports.
- Quality Assurance: Ensuring that work is executed according to quality standards and project specifications requires attention to detail.

Skills

a. Autocadand Building Technical Drawing
b. Cost Estimation and Budgeting

c. 2D House Planning and Design
d. Quality Control and Assurance
e. Client Communication and Coordination
f. Technical Proficiency
g. Time Management
h. Problem Solving Abilities
i. Attention To Detail

Education

- Duration: 2016-2019
  Diploma In Civil Engineering
  JVM College of Engineering
  Terdal, Karnataka, India.

- Duration: 2011-2012
  10th Boards
  Mother Teressa English Medium Highschool
  Jamkhandi, Karnataka, India.

Work Experience

- Residential Projects
- Commercial Projects
- Industrial Projects

Softwares

- AutoCAD 2D (Expert)
- MS Excel (Expert)
- MS Word (Expert)
- 3Ds Max (Beginner)

Languages

- English
- Hind
- Kannada
- Indonesian (Beginner)
